Leetcode: **Abhinav06**

CodeChef: **Abhinav06**

## Skills

### PROGRAMMING

- Python
- JavaScript
- C/C++
- HTML/CSS
- SQL

### TOOLS AND FRAMEWORKS

- Node.js
- React.js
- Express.js
- MongoDB
- Git

## CourseWork

- Data Structures and Algorithms
- Database Management System
- Computer Network
- Operating System
- Object-Oriented Programming

## ACHIEVEMENTS

- Global Rank 102 among 5000+ contestants in CodeChef Starter 34.
- Global Rank 165 among 3000+ contestants in April Lunchtime 2022.
- Currently having a strike of 58 days (and still counting) on Leetcode.
- I have 327 submissions at Leetcode in the last one Year.

## Projects

### BLOGSIFY

📅 Jan 2022 – Feb 2022

**Tools:** React.js, CSS, Express.js, Node.js, MongoDB, Git, Heroku, Netlify

- Github Link:- Frontend, Backend
- Deploy Link:- Blogsify
  - Blogsify is a platform where users can write their Blogs which can be seen and read by audience.
  - Blog Updation and Delete can only be done by the user who has written the Blog
  - User can update their profiles(including Profile Pics)
  - User can search Blogs according to the categories.
  - User Authentication (Login for existing user and Sign Up for new user).

### POKEMON MINIGAME

📅 Oct 2021 – Oct 2021

**Tools:** HTML, CSS, JavaScript

- Deploy Link • Github Link
  - There are 12 pairs of Pokemon Cards.
  - User can turn 2 cards at a time, if both cards are identical then that pair of cards disappear
  - Once all cards disappear user wins, but user losses if he/she ran out of time
  - I have also made a Digital Clock that acts as a timer.
  - Game is fully responsive for laptop, phone and tabs.

### PHARMACY MANAGEMENT SYSTEM

📅 Jan 2021 – Jan 2021

**Tools:** Python, MySQL

- Github Link
  - This is pharmacy management system where user can create, read, update and delete data of medicine in his database.
  - It provides a feature that the user can identify which all medicine will get expire till a particular date, So user can manage his/her new buying.
  - Contains a feature where it suggest the medicine according to the symptoms of the patient.

## Experience

### WEB DEVELOPMENT INTERN

ARCH-LABS

📅 June 2022 – Current

📍 Remote

**Tools:** React.js, CSS, Express.js, Node.js, MongoDB

- Developed and designed Arch-Labs website using React.js and CSS
- Assisting in building and designing the Frontend of Deepiotics website using React.js, CSS and React-icons
- Using Node.js and Express.js to connect with MongoDB database for storing and managing the responses of the user.
